

## **THE KENYA PROGRAMME OF ACTION**

- 1.1 The development of the Kenya Programme of Action is an iterative step following the Self-Assessment as presented in the APRM report. The analysis in the report has provided the issues around which the objectives have been established. Subsequently, indicators of performance and the expected outputs have been outlined.
- 1.2 The implementation of the POA will be undertaken as a collaborative effort between the Government of Kenya, the private sector and Civil Society. The development of the APRM and the POA has taken into account the existing Government programme frameworks and sectoral plans. However, the views articulated by stakeholders during the APRM process have remained paramount; and are the basis of the objectives, activities and the priorities contained in the POA.
- 1.3 It is planned that stakeholders' forums will be held in the course of May 2006 to brief them of status of the process, to reconfirm the priorities they articulated and to arrive at consensus on the modalities for implementation, monitoring and evaluation.
